

# California's Housing Cost Burden Crisis

And in which region is it the biggest problem?

The number of households in each County and the Average Percentage of Housing Cost Burdened Households

California is one of the most diverse states in the nation, and rising housing costs typically affect marginalized groups the most.

San Diego has the highest percentage of rent burdened households with 38.24, while Central/Southeast Sierra has the lowest with 22.87. Having over 20% of the population rent burdened is still a staggering percentage, and statewide actions need to be taken to reduce this.
